

## SR-D8-S

### ACTIVE LINE ARRAY SPEAKER

TOA SR-D8-M - это универсальная активная акустическая система линейного массива, оснащенная цифровым аудиовходом по протоколу CobraNet, цифровым сигнальным процессором, цифровым усилителем мощности и динамиками, сконфигурированными в линейный массив. Точное управление вертикальной направленностью колонок и шириной акустического луча позволяет создавать полностью оптимизированные звуковые пространства в самых разных местах.

SR-D8-S - это субколонка, управляемая с главной колонки SR-D8-M.

Всеми настройками функций можно управлять с удаленного ПК с помощью прилагаемого программного обеспечения для настройки. Оснащенный первичным аудиовходом, SR-D8-M (опция) передает аудиосигнал на вторичный SR-D8-S через специальный локальный канал SR-D8-M. Локальный канал позволяет последовательно подключить до 3 акустических систем SR-D8-S к одной SR-D8-M (опция), что позволяет сконфигурировать линейный массив из 4 подключенных акустических систем (далее этот многоблочный массив называется "стек"). В полной системе можно управлять до 4 стеков, что позволяет создавать акустические системы, состоящие из 16 колонок.

Номер статьи:SR-D8-S CE
